### Environmental Certifications

## We Stand by What We Offer!

Being always loyal to its beliefs and values, ISOPIPE gives special attention and particular sensitiveness concerning issues of both Environmental Sustainability and Energy Efficiency in order to save our planet and the human life, accordingly.

Having already acquired more than 60 certifications from accredited Institutions worldwide, complying with the latest European and International standards, ISOPIPE is in the pleasant position to announce its latest environmental certifications:

✓ EN ISO 14001:2015

✓ EPD EN 15804 & ISO 14025

By following the International Standards, which present transparent, verified and comparable information about the life-cycle environmental impact of products and services, ISOPIPE shows its commitment towards this effort.

Moreover, ISOPIPE demonstrates and notifies in the best way about the environmental superiority of all its Integrated Insulation Products and services provided, besides their high-quality and outstanding performance for more than 25 years.

ISOPIPE's products are distinguished for their energy saving and environmental repercussions as they:

- have low thermal conductivity and low carbon dioxide emissions (CO<sub>2</sub>)
- are CFC, HFC & HCFC free with Zero Ozone Depletion Potential (ODP)
- offer minimum contribution to the global temperature rise due to the greenhouse effect
- have their packaging by completely recyclable raw materials
- have production residues that are rejected in the most environmentally friendly way

and can be used in various fields such as hospitals, food industries, airports and others with great safety and long duration.
